Optimaheat Technologies

Manufacturer of Zero Liquid discharge Plant - Multi Effect Evaporator Plants and Mechanical Vapor Re-compression Evaporator Plants.

Mechanical Vapor Re-compressor Evaporator Plants.

Mechanical vapor re compression is the most effective means available for economizing on energy consumption. Turbo Blowers or roots blowers are used as mechanical vapor re-compressor depending on capacity of the compressors. OptimaHeat Technologies offers one stage or two stage re compression operation in our plants. This is done to minimize power consumption for mechanical vapor compressor.

Salient Features - Benefit to Users

- Lowest Operating Cost
- Fully Electricity Driven
- Low Maintenance
- Compact Design
- Simple Operation

Multiple Effect Evaporation Plants

OptimaHeat Technologies offer various combinations of multiple effect evaporators for zero effluent discharge applications. Higher number of effects consequently provides very high economy ratios (product to steam) and results in low operating costs.
